

Epic 7: Saving the Model

Objective

Save the trained Linear Regression model using Python's Pickle module.

Files

- save_model.py
- HDI.pkl
- README.md

Libraries Used

- pandas
- scikit-learn
- pickle

Steps Performed

1. Loaded the HDI dataset.
2. Selected independent and dependent variables.
3. Split the dataset into training and testing sets.
4. Trained the Linear Regression model.
5. Generated predictions.
6. Saved the trained model as **HDI.pkl**.

Output

The trained machine learning model was successfully saved and is ready to be used in the Flask application.
