

Setup Folder Structure

The project folder structure was created to organize datasets, source code, machine learning models, templates, static resources, notebooks, and project documentation. A well-organized directory structure improves maintainability, simplifies navigation, and ensures all project components are stored in their appropriate locations.

Project Structure

```
```text
HDI-PREDICTION-SYSTEM
|
|— dataset
| └─ hdi_dataset.csv
|
|— model
| └─ hdi_model.pkl
|
|— notebook
| └─ HumDevIndex.ipynb
|
|— static
| ├── css
| │ └─ style.css
| ├── images
| └─ js
|
|— templates
| └─ index.html
|
|— screenshots
|
|— docs
|
|— app.py
|— train_model.py
|— README.md
|— requirements.txt
└─ .gitignore
```
```

Outcome

- Created all required folders.
- Organized files into their respective directories.
- Verified the folder hierarchy.
- Prepared the project for development and GitHub upload.
